Problem 2: In chemical engineering we often employ the Van Laar equations for correlating activity coefficients. In particular for a binary system (i.e., two chemical species) the equations are ? B = exp 12 = exp {[1+(x, / x2) (A/B)]} 1{1+(x/x) (B/A)}] (1) The excess Gibbs free energy is given in terms of the activity coefficients as = x, ln(71)+x, ln (Y2) (2) [RT] We have been given two good ...

Offering a balanced approach to problem-solving issues in a complex and changing world, this book focuses specifically on the subject of problem solving in policing. Featured selections include chapters on domestic security, disorderly youth, auto theft, prostitution, gang delinquency and crime in public housing. Other notable selections discuss the role of supervising police personnel engaged in problem solving, advances in using this approach in criminal investigations, solving serial crimes, preparing for terrorism, and developing patrol officers as effective first responders to active violence.

Featuring a wide range of engaging activities with a wealth of illustrations, this practice book provides lively and enjoyable exercises using reading and writing skills and some conversation for intermediate students of Arabic. The carefully graded activities will reinforce vocabulary and concepts in a variety of ways and so increase confidence and understanding. It is the perfect companion to Mastering Arabic 2 or any other post-beginner's courses. The book teaches the universally understood Modern Standard Arabic. A website accompanies the Mastering Arabic series with additional material linked to this book plus a wide range of extra activities. This book is aimed at learners who have completed a beginner's course and are now working through or have completed a post-beginner's course, offering extra practice material.

Give your soon-to-be second grader a head start on their upcoming school year with Summer Bridge Activities: Bridging Grades 1-2. With daily, 15-minute exercises kids can review two-digit place value and verb tenses and learn new skills like measurement and compound words. This workbook series prevents summer learning loss and paves the way to a successful new school year. --And this is no average workbook!Summer Bridge Activities keeps the fun and the sun in summer break! Designed to prevent a summer learning gap and keep kids mentally and physically active, the hands-on exercises can be done anywhere. These standards-based activities help kids set goals, develop character, practice fitness, and explore the outdoors. With 12 weeks of creative learning, Summer Bridge Activities keeps skills sharp all summer long!

"The new Common Core Math Standards have been formulated to provide students with instruction that will help them acquire a thorough knowledge of math at their grade level, which will enable them to move on to higher mathematics with competence and confidence. Along with learning concepts and skills, students need instruction and activities that encourage them to collaborate with other students, utilize technology, communicate ideas about math both orally and in writing, and gain an appreciation of the significance of mathematics to modern life. Hands-on Activities for Teaching the Common Core Math Standards, Grades K-2 is designed to address these needs. This resource has several important goals. The activities in this book will help students: Gain understanding of math concepts and skills, based on the new Common Core Standards, apply their understanding of concepts and skills, develop proficiency in calculations, learn to think abstractly, think critically using mathematical reasoning, employ various problem-solving strategies, gain fluency in communicating about math, develop the foundation for success in higher mathematics"--

Guide children to new heights with the Creative Problem Solving methods outlined in CPS for Kids. This book will teach your students an exciting and powerful problem-solving method from start to finish. Each step in the process, from finding problems to finding solutions, is outlined in detail and includes accompanying activities on reproducible pages. Designed for students in grades 2-8, these activities are challenging and interesting. Creative Problem Solving is a process that allows people to apply both creative and critical thinking to find solutions to everyday problems. CPS can eliminate the tendency to approach problems in a haphazard manner and, consequently, prevents surprises and/or disappointment with the solution. Students will learn to work together or individually to find appropriate and unique solutions to real-world problems they may face by using this tested method. Most importantly, they will be challenged to think both creatively and critically as they tackle each problem they face. CPS for Kids includes 30 reproducible classroom activities. Grades 2-8
