Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Recounts the life and career of the inventive and controversial rock musician, and includes information on his philosophies on art, his opinions on the music industry, and his thoughts on raising children.

This book is published under a CC BY-NC 4.0 license. The editors present essential methods and tools to support a holistic approach to the challenge of system upgrades and innovation in the context of high-value products and services. The approach presented here is based on three main pillars: an adaptation mechanism based on a broad understanding of system dependencies; efficient use of system knowledge through involvement of actors throughout the process; and technological solutions to enable efficient actor communication and information handling. The book provides readers with a better understanding of the factors that influence decisions, and put forward solutions to facilitate the rapid adaptation to changes in the business environment and customer needs through intelligent upgrade interventions. Further, it examines a number of sample cases from various contexts including car manufacturing, utilities, shipping and the furniture industry. The book offers a valuable resource for both academics and practitioners interested in the upgrading of capital-intensive products and services. [The work performed in the project [Use-It-Wisely (UIW): significantly contributes towards a collaborative way of working. Moreover, it offers comprehensive system modelling to identify business opportunities and develop technical solutions within industrial value networks. The developed UIW-framework fills a void and offers a great opportunity. The naval construction sector of small passenger vessels, for instance, is one industry that can benefit.] Nikitas Nikitakos, Professor at University of the Aegean, Department of Shipping, Trade, and Transport, Greece. [Long-life assets are crucial for both the future competitiveness and sustainability of society. Make wrong choices now and you are locked into a wrong system for a long time. Make the right choices now and society can prosper. This book gives important information about how manufacturers can make right choices.] Arnold Tukker, Scientific director, Institute of Environmental Sciences (CML), Leiden University, and senior scientist, TNO.

Master the mysteries of wine. The study of wine and beverages has become integral tohospitality education. The Wine, Beer, and Spirits Handbookdemystifies the wine and wine-making process, examining not onlythe making and flavor profiles of wine, beer, and spirits, but alsothe business of wine service as practiced by a chef sommelier. Unique to this book, is the strong emphasis on food and winepairings, as well as food and beverage interactions. An entirechapter uncovers this broad, often intimidating, topic withdetailed information on table wines, sparkling wines, fortifiedwines, beer and spirits. More importantly, The Handbook explainsthe responsibilities of a sommelier from both service andmanagerial perspectives. Readers explore their wine-related dutiesincluding: the developing of wine lists, identifying faulty wines,ordering, receiving, and storing wines, conducting inventorycontrol, pricing, product research, cellar management, and thehealth and legal implications of wine consumption. A comprehensive, one-stop resource to the character and best useof beverages, The Wine, Beer, and Spirits Handbook will helpevery student, chef, sommelier and wine enthusiast confidentlymaster the mysteries of wine and other beverages.

Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.
