- Physiology changes in 5 time frames that fit into 2 categories. - Body size is one of an animals most important traits because it effects a lot of things like surface-to-volume ratio, shape, organ size and shape, composition and material properties of some tissues, physiological rates, life history traits, etc.

### Animal Physiology- Chapter 1 Flashcards | Quizlet

Step 1 of 1 One characteristic of the human body (and that of animals) is that it is in dynamic exchange with the environment. By dynamic exchange, we mean that the atoms of elements that are present within our bodies are lost to the outside and are replaced by new atoms. We release carbon dioxide during exhalation.
