Astaxanthin A Comparative Case Of Synthetic Vs Natural ...

Astaxanthin has been reported to be one of the most potent compounds in terms of its antioxidant activity, 65 times more powerful than vitamin C; 10 times stronger than β -carotene, canthaxanthin ...

(PDF) Synthetic astaxanthin is significantly inferior to ...

Astaxanthin /æstəˈzæŋθɪn/ is a keto-carotenoid. It belongs to a larger class of chemical compounds known as terpenes built from five carbon precursors, isopentenyl diphosphate, and dimethylallyl diphosphate. Astaxanthin is classified as a xanthophyll, but currently employed to describe carotenoid compounds that have oxygen-containing components, hydroxyl or ketone, such as zeaxanthin and canthaxanthin. Indeed, astaxanthin is a metabolite of zeaxanthin and/or canthaxanthin, containing ...

Astaxanthin - Wikipedia

Astaxanthin and vitamin A concentrations in fish depend on the dietary dose. The results showed the function of astaxanthin as a provitamin A source in Atlantic salmon. The relationship between astaxanthin and vitamin A in Atlantic salmon held in seawater was also studied (Storebakken et al., 1993). Vitamin A supplementation in the diet does not affect the concentration of astaxanthin in flesh.
