Chapter 36 The Cold War Begins Answers To Documents

This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's

Chapter 36 The

Communist revolution in 1949 set the stage, Chen says. The Korean War, the Taiwan Strait crises, and the Vietnam War--all of which involved China as a central actor--represented the only major "hot" conflicts during the Cold War period, making East Asia the main battlefield of the Cold War, while creating

conditions to prevent the two superpowers from engaging in a direct military showdown.

Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with

Deterrence as a strategic concept evolved during the Cold War. During that period, deterrence strategy was aimed

mainly at preventing aggression against the United States and its close allies by the hostile Communist power centers--the Union of Soviet Socialist Republics (USSR) and its allies, Communist China and North Korea. In particular, the strategy was devised to prevent aggression involving nuclear attack by the

Chapter 36 The

USSR or China. Since the end of the Cold War, the risk of war among the major powers has subsided to the lowest point in modern history. Still, the changing nature of the threats to American and allied security interests has stimulated a considerable broadening of the deterrence concept. Post-Cold War Conflict

Chapter 36 The

Deterrence examines the meaning of deterrence in this new environment and identifies key

elements of a post-Cold War deterrence strategy and the critical issues in devising such a strategy.

It further examines the significance of these findings for the U.S.

Navy and Marine Corps. Quantitative and qualitative measures to

The capabilities of U.S. naval forces that especially bear on the deterrence objectives also are examined. Finally, the book examines the utility

understanding of situations in which deterrence must be used and in improving the potential success of deterrence actions.

After World War II, a powerful conviction took hold among American

By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they

hoped to link development with security, preventing revolutions and rapidly creating liberal, capitalist states. In *The Right Kind of Revolution*, Michael E. rarely went as its architects anticipated. Nationalist leaders in postcolonial states such as India, Ghana, and Egypt pursued their own independent visions of development. Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality,

regimes and exacerbating the very revolutionary dangers they wished to resolve. Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s. Since the end of the Cold War the faith in modernization as a panacea has reemerged. The idea of a global New Deal, however, has been

Throughout Eastern Europe, the friendship project shaped the most intimate aspects of people's lives,

Applebaum argues that in Czechoslovakia, socialist friendship was surprisingly durable, capable of surviving the ravages of Stalinism and the Soviet invasion that crushed the 1968 Prague Spring. Eventually, the project became so

successful that it undermined the very alliance it was designed to support: as Soviets and Czechoslovaks got to know one another, they discovered important cultural and political differences that contradicted propaganda about a cohesive socialist world. Chapter 36 The Cold War

General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in
