All concepts and themes are touched on with the historical background one would expect, but also with current examples to make the reading more relevant. The content is written in such a way that it is approachable and appealing. It includes all of the important themes in a succinct and engaging narrative style that can easily be understood. From the Field boxes and opening vignettes help anyone who has not personally traveled much of the world. General readers will also find the latest data as they build their understanding of important concepts.

Revised, Extended, and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students, Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography. As with the First Edition, Boyle follows the premise that “history makes

geography whilst geography makes history,” and that the key to studying the principal demographic, social, political, economic, cultural and environmental processes in any region in the world today is to look at how that region has been impacted by, and in turn has impacted, the story of the rise, reign, and decline of the West. Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical, political, and institutional project. Informed by recent developments in post-colonial scholarship, the book covers key concepts, seminal thinkers, and influential texts in the field. Although designed for the beginner student, Boyle does not shy away from ideas and debates often avoided in introductory texts, clearly communicating theory without condescension. In addition, he places human geography in its larger academic context, discussing the influences on the field from related subjects. Notable features in the Second Edition include: Extensive revision and updating of coverage of key ideas, developments, debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid-19s geographies New learning resources (figures, tables, plates, maps, Deep Dive boxes, etc.) throughout the text, plus learning objectives, essay questions, checklists summarizing key ideas, and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter-by-chapter lectures and PowerPoint slides for each chapter, new multiple-choice exam paper and additional essay-style exam questions, and a wide range of student tutorial exercises Human Geography: An Essential Introduction,
