Lightheadedness: Persistent Lightheadedness
An unfortunate reaction in society is anytime there is some type of pain or chronic condition, the automatic reflex is to assume it is cancer. Although intracranial tumors would cause constant lightheadedness, there are many more common things to consider before we get to this category. A mass in the brain will increase the intracranial pressure and lead to constant headaches, lightheadedness and then neurological changes if the mass grows unopposed and undetected.

6 Causes Of Constant Lightheadedness | Cardiovascular ...
do not get up suddenly after sitting or lying down. do not do anything that could be dangerous while you're dizzy, like driving, climbing a ladder or using heavy machinery. do not lie totally flat if you feel like things are spinning.

Dizziness - NHS
Persistent postural-perceptual dizziness (PPPD) is a newly defined diagnostic syndrome that unifies key features of chronic subjective dizziness, phobic postural vertigo and related disorders. It describes a common chronic dysfunction of the vestibular system and brain that produces persistent dizziness, non-spinning vertigo and/or unsteadiness.
