~~Right-Brain-Dominant Learning Styles~~

The angular and supramarginal gyrus serve as a "reading integrator" a conductor of sorts, linking the different parts of the brain together to execute the action of reading. These areas of the brain connect the letters c, a, and t to the word cat that we can then read aloud.

~~The Reading Brain: How Your Brain Helps You Read, and Why ...~~

A number of brain regions are involved in reading and comprehension. Among them are the temporal lobe, which is responsible for phonological awareness and for decoding and discriminating sounds; Broca's area in the frontal lobe, which governs speech production and language comprehension; and the angular and supramarginal gyrus, which link ...

~~Reading and the Brain | Neurobiology~~

The right brain is the root of emotions, intuition and visualization. You can encourage your brain to explore its creative side through activities that stimulate these processes. Since the left hemisphere of the brain is the logical, sequential side, one way to build the right side of the brain is to perform tasks "illogically."

~~Activities for Enhancing the Right Brain | Healthfully~~

The left brain is more verbal, analytical, and orderly than the right brain. It's sometimes called the digital brain. It's better at things like reading, writing, and computations. According to...

~~Left Brain vs. Right Brain: What's the Difference?~~

Right Brain Reading A. PHONICS 1. You've tried the phonics games. You've done many phonics lessons. Each lesson is like a new lesson to your struggling student. Where is the memory for the sounds you're so diligently teaching? If the regular method ...

~~TEACHING THE RIGHT BRAIN CHILD PART I~~

As reading skills improve with intensive instruction, brain activity increases in key areas in the left side of the brain. Intensive reading instruction also leads to changes in the right side of the brain. The changes in the right side of the brain may help make up for weaknesses on the left. We need more research to figure out if all of these changes, on the left and right sides of the brain, need to happen for reading skills to improve.
