Create assessments that meet state standards and target students' learning needs! In this revised edition of her bestseller, Kay Burke provides a wide range of easy-to-implement alternative assessments that address today's accountability requirements. Designed for use across all content areas, these formative assessments are rooted in the language of state standards and emphasize differentiating instruction to meet students' diverse learning needs. Updated research and examples help K–12 teachers:
Build Response to Intervention checklists for struggling students
Develop unit plans using differentiated learning and assessment strategies
Create portfolios that emphasize metacognition
Design performance tasks that motivate and engage students
Construct rubrics that describe indicators of quality work
Create tests that focus on higher-order thinking skills

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.
