In 1908, Godfrey Hardy and Wilhelm Weinberg independently discovered the laws that govern such populations. These laws can be explored in the Hardy-Weinberg Equilibrium Gizmo™. 1. The parrots you see on the SIMULATION pane represent a larger population of 500 parrots. Select the TABLE tab. How many parrots of each genotype are in the initial population

Hardy Weinberg Equilibrium Gizmo Answer

Hardy-Weinberg principle – principle stating that the proportions of different alleles and genotypes in a population will remain stable as long as certain conditions are met. The Hardy-Weinberg principle applies to large populations in which mating is random, there is no migration, no mutations are occurring, and natural selection is not occurring for the alleles in question.
